

AFFIDAVIT OF DAVID C. CROMPTON

I, David C. Crompton, declare under oath as follows:

1. I make this affidavit based on my own personal knowledge.
2. I am the president and Chief Executive Officer of Quick Fitting, Inc., a company headquartered and located at 30 Plan Way, Warwick, RI 02886 (“Quick Fitting”).
3. The 2010 License and Supply Agreement (“2010 LSA”) contained terms of strict confidentiality, non-disclosure, and non-competition and granted a license to use information from Quick Fitting “solely...in connection with the manufacture of [products] on behalf of and for distribution by Quick Fitting...” The 2010 LSA also dealt with product quality issues.
4. Andrew Yung represented the Cixi City Wai Feng Ball Valve (“CCWFBV”) was the manufacturing and production division of W&F Manufacturing.
5. Over time Quick Fitting grew dissatisfied due to product quality and service issues and eventually wished to disassociate itself from W&F Manufacturing and its purported manufacturing arm, CCWFBV, as a supplier of its products.
6. In 2011 I made a trip to China and inspected the new EFF manufacturing facility, which was different from the Cixi City Wai Feng Ball Valve facility. I do not believe, based on representations by Andrew Yung, that any product was supplied by the new entity or factory until after I visited and approved the new facility in China and the 2011 License and Supply Agreement (“2011 LSA”) was executed.
7. After Andrew Yung informed Mueller of our pricing from the Yung Entities on the brass push-fit products we were selling to Mueller and offered to sell push-fit products to Mueller, Quick Fitting was unable to raise any prices that it charged Mueller for products,

other than price changes that were driven solely by changes in prices of commodities.

8. The volume of products sold to Mueller has increased since 2011; however Quick Fitting has been unable to increase its prices or charge prices in line with other customers due to the Yung Entities disclosures to Mueller.

9. The three product numbers contained in the below email excerpt between Watts Water and the Yung Entities are the same product numbers used by Quick Fitting for three push-fit connector hoses previously manufactured by the Yung Entities for Quick Fitting:

From: "vivian wang" <vivian@eff-fitting.com>
Subject: push -fit products
Date: 28 February, 2013 4:26:38 AM GMT+08:00
To: "Wilson, Rhonda" <Rhonda.Wilson@WATTS.COM>
Cc: "Andrew Eff" <andrew@eff-fitting.com>

Andrew:

Pls quote the PB725F, PB7245 , and PB728K, price will be quoted in blister pack.

Also , I've asked William check with CSA of the ANSI/NSF-61 and ASSE1061, these were designed certified for use in potable water, Rhonda, is this the one we will check with CSA?

vivian

10. The purchase orders issued by Quick Fitting to the Yung Entities during the course of our relationship are attached to the Statement of Counter-Facts submitted herewith.

11. I am familiar with the single purchase order produced by the Yung Entities to Cixi Welday. It is my opinion that Cixi Welday would have needed Quick Fitting's confidential manufacturing drawings and specifications to fulfill this order as it would have to supply the stainless steel grip rings that it did.

12. I observed Andrew Yung attending a trade show and staffing the booth of his cousin's company, China Welday, in 2014. China Welday that same year came out with a full line of brass push-fit products that nearly replicates the line the Yung Entities were manufacturing for Quick Fitting under license. Attached at *Tab A* is a copy of a product

sheet offered by China Welday at the 2014 AHR Show.

13. Quick Fitting had information that the Yung Entities were selling brass push-fit product on various Internet website. Attached to this affidavit as *Tab B* are just a few samples of Internet images we and our counsel had found indicating that the Yungs had an Alibaba.com store by the name of *waimao.en.alibaba.com*, which referenced EFF Manufactory, its address, and Jimmy Yung. Also attached at *Tab B* are samples of web portal pages of Texoon Brass Works, which was formerly Cixi City Wai Feng Ball Valve Company, the company that the Yung Entities had represented was a manufacturing division owned by them and included in the 2010 LSA signed by Andrew Yung. Those pages demonstrate that Texoon was actively selling push-fit products – with photos bearing the “waifeng.en.alibaba” name.

14. The Yungs had denied offering and selling brass push-fit products on the Internet but were forced to admit they had done so, and finally produced, under Order of the Court and in the *final days* of discovery in this matter, a handful of Alibaba records referencing, without photos, the posting and offering for sale of brass push-fit products on Alibaba.com *during* this litigation. Those records are attached at *Tab C* hereto.

15. Quick Fitting’s annual sales to its major customers is significantly more than the liquidated damages provision, and the liquidated damage provision is a reasonable estimation of the potential losses and damage, which are difficult to quantify. As happened with Mueller Industries in this case, when a contracting manufacturer provides confidential pricing information to a customer and attempts to compete with Quick Fitting for the customer, Quick Fitting is unable to raise the prices at which it sells to the customer. The resulting damages, which extend over a multi-year period, are difficult or impossible to

accurately quantify, and Quick Fitting selected the liquidated damage amount to reasonably anticipate such harm. All of Quick Fitting's contracting manufacturers have agreed to the same liquidated damages provision and amount. Any reference to the word "punitive" in deposition testimony was intended to reflect the fact that the damages caused by breaching the agreement are significant enough to ensure compliance with the contractual restrictions.

16. During the course of its business dealings with the Yung Entities, Quick Fitting regularly communicated with the Yung Entities regarding the identity of its customers, markets, and marketing efforts.

17. Some of the product sheets appearing on the quickfitting.com website are labelled as "proprietary," but the referenced product sheets do not disclose information necessary for manufacture or production of the pieces. The product sheets contain information used by users/installer of the pieces.

18. Quick Fitting has paid all amounts due and owing to its suppliers and denies owing any money to the any of the parties in this litigation or CA No. 11-463 and CA No. 14-243.

19. Quick Fitting sells its products nationally. The State of California enacted legislation in 2006 limiting the lead content of plumbing fixtures used for potable water to 0.25%, effective January 1, 2010, and requiring that such plumbing products be certified by an independent third-party accredited by the American National Standards Institute (ANSI). Vermont enacted a similar law, Vermont 193, which took effect on January 1, 2010, and Maryland followed with similar restrictions effective January 1, 2012. The federal Reduction of Lead in Drinking Water Act, signed into law in January 2011, amended the Safe Drinking Water Act ("SDWA") to comport federal lead content limits with those already in force in

California and the other states. The SDWA federal regulations took effect in January 2014 and cover plumbing products that convey or dispense water for human consumption through drinking or cooking. As a result of these laws and regulations, certifying agencies enacted requirements for testing and certification of plumbing products, including what's known as "Annex G" for ANSI/NSF 61, published in January 2009 and setting out a method for calculating the lead content of a product by way of a weighted average of all wetted surface areas (now ANSI/NSF Standard 372), consistent with the requirements of the California standard. These laws and regulations required Quick Fitting to work toward compliance with reduced lead limits well ahead of the January 2014 implementation of the federal SDWA.

20. During the business relationship between Quick Fitting and the Yung Entities, we often received communications from EFF LLC and EFF Inc. indicating their use of the 10 Brodie Drive, Ontario, Canada address. A sample of such communications are attached at *Tab D* to this Affidavit.

21. Near the end of the relationship, Quick Fitting received more than 30-thousand ball valves from the Yung Entities marked with one brand while the handles were marked with a different brand name. Attached at *Tab E* are a couple of sample email communications wherein the Yungs declined to assist, leaving Quick Fitting to purchase equipment and supplies and put its own employees to work removing, cleaning, and re-stamping the products.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on this 26th day of October, 2017.

David C. Grompton

Subscribed and sworn to before me on the _____ day of October, 2017.

Notary Public

Lead Free

NSF/ANSI 61

FEATURES AND BENEFITS

- ◆ Fit Copper, CPVC or PEX Pipe.
- ◆ Contain an inner Lining for PEX tubing.
- ◆ No soldering, clamps, glues or tools required.
- ◆ Designed for hydronic heating as well as potable water distribution.
- ◆ Certified to NSF 14, ANSI/NSF 61, NSF372(AB1953) and ASSE 1061 product standard.

LISTING AND APPROVALS

- ◆ ASSE 1061/NSF61/NSF372(AB1953)
- ◆ Meet UPC and cUPC requirements
- ◆ Listed by IAPMO

PERFORMANCE

- ◆ Maximum working pressure-----200psi
- ◆ Maximum temperature-----200°F 93°C
- ◆ Application-----Potable water and hydronic heating

Lead Free

NSF/ANSI 61

TECHNICAL DATA MATERIAL LIST

Body	C46500,C69300
Release Collar	POM
Support Sleeve	POM
Protector	PA
Inner Lining	PPSU
O-ring	EPDM
Grasp-ring	Stainless Steel 304

INSTALLATION

- ◆ The tube shall be inserted into the push-fit fitting in the first stage through a release collar and then through a stainless steel grab ring.
- ◆ The grab ring has teeth that open out and grip onto the tube.
- ◆ At the second stage the tube shall be pushed through an O-ring protector which aligns the tube.
- ◆ Only when the tube has passed through the O-ring and reached the tube stop shall a secure joint be created.

Subject: Re: Return Mini Valves-PB953S

Hello Emerson,

We have marked up the same drawing you sent in this e-mail and have noted issues for you with the fitting. A second photo is attached to this e-mail as well it is a photo of one of your PB953S that was shipped to us in the same shipment that was approved by our quality control.

I believe you have all the fittings of this SKU that needed to be returned.
Jordan will be contacting you with the final numbers for this product return.

Please feel free to contact me further with any questions.

Subject: Coutinous Compliance inspection report(IAPMO R&T)

Dear Michael,

Please read this inspection report.

During inspection, the inspector randomly selected product ML-LF814. The inspector made the following recommendations:

- A. If Muller is a subsidiary of Quick Fitting; product can still display Muller's logo.
- B. If Muller is only a business partner with Quick Fitting, and then the product must display Quick Fitting logo.

Also, inspector still has not received Finalized Formulation List (FFL). Please send (FFL) to us ASAP. If we fail the next continuous compliance inspection, there will be a penalty. We will not be liable for the penalty; you will have to pay the penalty.

Best Regards,

Hello Jacky and Andrew,

I spoke with David about the additional product that your company has shipped on purchase orders that our company has placed. Andrew tried to tell me this morning it's considered common practice when an overrun occurs it is sent on and charged to the customer. David has no such knowledge of this practice; none of our other vendors has this practice. We expect to receive what we have ordered and no additional product unless it is on our purchase orders.

We need copies of our invoices sent to us that you are stating as past due. They must reflect what we have ordered on each on our purchase orders.

Regards,

Hello Jacky,

Jacky we are actually talking about the same invoices/ purchase orders your invoice number is 70741 while our purchase order is 457389.

Again we are looking for clarification, perhaps these items were owed to us from another purchase order or it was product that was sent to replace damaged product. We need to understand why additional product that was not on the original purchase order has been associated with this or any purchase order.

We had spoke with you about the recent mailing because of the issue of the invoices being dated march 2, 2012 which was 12 days before they were mailed from your company on March 14, 2012. This discrepancy would put us 12 days into our net 30 at no fault of ours.

Subject: FW: Bal Valve Handles

Jordan:

It will take 10 days to produce these handles, and cost will be \$2300. (Andrew clarified yesterday that we are not responsible of handle marking)
Pls place a separate order of the handle with full amount prepaid, then we will start working.

Thanks
vivian

Andrew,

We have a problem with your last shipment of ball valves for PROLINE. We received 14,800 MI-LF912 and 9,500 MI-LF922 which were stamped "PROLINE" but the handles on the valves say "PROBITE"

Per our drawings, all of these ball valves should have handles that are marked PROLINE. We need you to send 24,300 of these handles by air ASAP at your cost.

How quickly can you send these?

Regards,

Jordan Crompton

Hi Frank

It was impossible to do that, you talking about our factory from china and come to Boston fix the problem. I never know about this issue , never receive the CAR. Return the product to us at Toronto. but i can promise when will be fix and return back to you , but we will try best for you .
